SUZOHAPP receives the Innovation Award at ATMIA Conference for Cash Recycling Technology

The ATMIA "ATM and Cash Innovation" Conference took place on June 13 & 14 in London. This edition celebrated the 50th anniversary of the ATM industry which has revolutionized financial services, access to cash and human spending habits. At the Celebratory Gala Dinner, the first 50 years and the future of ATMs were commemorated and awards were given to organizations that made unique contributions to the development of the ATM industry over the years.

SUZOHAPP received the Silver Innovation Award for its innovative Cash Recycling Technology, thanks to SCAN COIN solutions. "We are honored to receive this prestigious award as recognition of our ongoing dedication and commitment to the industry," explained Walter ter Rahe, Vice President of Sales Banking EMEA.

"This award is an amazing achievement for us. We are always focused on bringing innovations to the industry and our Recycling Cash Solutions ensure a quick return on investment through improved cash management," added Jim Anderson, Managing Director of SCAN COIN UK.

At the event, a selection of SCAN COIN cash processing solutions and their sophisticated software platform were successfully displayed. The biggest highlight was the innovative CDS-9R, the world's first self-service coin recycler for public environments, which offers the most secure and effective way to handle cash transactions, removing the need for costly coin roll dispensers and separate coin deposit machines.

"The CDS9-R transforms customers' coin handling into a completely automated process and minimizes costs to the banks. Thanks to our new solution, you can take control of your cash through an efficient cash cycle in all areas of your business, from internal cash handling to CIT operations," concluded Walter ter Rahe.

About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement.
